(from \$20)

Q4 miss: Travelzoo recently (on March 3) reported its fiscal Q4 2021 results. Revenue was \$14 million (+13% y-o-y), compared with our estimates of \$17 million and consensus of \$18 million. Pro forma EPS was \$(0.14) (vs. \$0.19 y-o-y), compared with our and consensus estimates of \$0.14. There was no Q4 2021 guidance, but it did qualitatively stated that it will be “profitable”.

Recovery lumpy: Revenue growth was -3% in U.S. and +77% in Europe as the company continues to face lumpy and volatility in its rebound from the pandemic lockdowns in 2020. This quarter saw weakness again in the U.S. while Europe rebounded much better.

Omicron impact in Q4: The company had some weakness in travel demand in Q4 due to the rise of the Omicron variant of COVID-19 especially in the U.S. However, so far in Q1, travel is rebounding again as COVID-19 eases. The company is optimistic that leisure travel can improve materially over the next year as COVID cases continues to improve and consumer demand rebounds (from pent up demand) and improves. In addition, more travel locations (including the U.S.) is opening back up to international travelers.

Subscribers declines: In Q4, the company had 16.9 million North American, and 8.4 million European subscribers to its newsletter (compared with 17.2 million and 8.4 million, respectively, last quarter). This brings total subscribers to 25.3 million (compared with 25.6 million in Q3). In Q4, Jack’s Flight Club had 1.8 million subscribers versus 1.7 million in Q3.

Q1 guidance to be “profitable”: The company did not provide Q1 2022 guidance, but did qualitatively state that it will have “substantially higher revenue and a return to profitability in Q1”.

Lowering estimates: We are lowering our 2022 estimates for revenue to \$79 million, from \$85 million, and for EPS to \$0.75 from \$0.90.

Travel industry outlook continues to improve: The company’s near term outlook is still volatile as the travel industry (airlines and hotels) is still recovering from the pandemic. However, with recent improving COVID-19 data, we expect significant improvements in the travel industry in 2022.

More solid signs of travel industry rebound: We are seeing continued positive data for the U.S. travel industry that indicate that the travel industry is recovering strongly to pre-pandemic levels. Near-term visibility continues to improve even factoring the recent spike and declines from the Omicron variant. Even in Europe where travel rebound was lagging the U.S., travel is rebounding strongly and catching up to the U.S. recovery. We have greater confidence in a rebound in the travel industry over the next year.

Major cost cuts improves profitability: Travelzoo’s “substantial” expense reductions in 2020 and its divestiture of its money losing Asia business in Q1 2020 will position it to generate much higher profitability as revenue returns.

Long term positive: We believe that execution of its long term plan, a strong rebound/long term travel industry, history of strong recoveries for the travel industry after negative shocks or events, and a positive long-term growth outlook bodes well for its share price to increase longer term.

Current valuation attractive: We are maintaining our BUY rating, but lowering our 12-month P/T to \$18 from \$20, which is based on a 19x P/E multiple on our 2023 EPS estimate of \$0.94 which we estimate is its near term EPS growth rate.

We currently expect substantially higher revenue and a return to profitability in Q1 2022. We continue to see a trend of recovery of our revenue. However, there could be unexpected fluctuations in the short term. During the pandemic, we have been able to lower our fixed costs. We believe we can keep our fixed costs relatively low in the foreseeable future—while revenue is expected to grow.

HOLD: We expect the stock to provide a total return of negative 15% to positive 15% within a 12-month period.

Ascendant Capital Markets, LLC Rating System

Prior to January 31, 2014, ASCM used the following rating system:

Strong Buy: We expect the stock to provide a total return of 30% or more within a 12-month period.

Buy: We expect the stock to provide a total return of between 10% and 30% within a 12-month period.

Neutral: We expect the stock to provide a total return of between minus 10% and plus 10% within a 12-month period.

Sell: We expect the stock to provide a total return of minus 10% or worse within a 12-month period.

Speculative Buy: This rating is reserved for companies we believe have tremendous potential, but whose stocks are illiquid or whose equity market capitalizations are very small, often in the definition of a nano cap (below \$50 million in market cap). In general, for stocks ranked in this category, we expect the stock to provide a total return of 50% or more within a 12-month period. However, because of the illiquid nature of the stock's trading and/or the nano cap nature of the investment, we caution that these investments may not be suitable for all parties.

Total return is defined as price appreciation plus dividend yield.
