

SINTX Technologies, Inc.

Q3 about inline. We believe biomedical and ceramic armor commercialization ramp in 2022/23 to be positive for stock. Lowering P/T to \$2.00.

Q3 about inline: SINTX recently (on November 14) reported its Q3 2022 (ending September) results. Revenue was \$0.4 million, compared with our and consensus estimates of \$0.2 – 0.3 million. Net loss was \$2.7 million or EPS of \$(0.11), compared with our and consensus estimates of \$(0.11) - (0.12). There was no Q3 guidance.

Operating expenses: Operating expenses were \$3.1 million (vs. \$3.0 million in Q2).

No guidance: Management again declined to provide forward guidance.

Adjusting 2022 estimates: We are adjusting our 2022 estimates for revenue to \$1.2 million from \$1.1 million, and for EPS to \$(0.35) from \$(0.44).

Focused on silicon nitride commercialization: SINTX is focused on developing silicon nitride products for medical and non-medical products in collaboration with medical/non-medical products manufacturers. The company believes that silicon nitride has a superb combination of properties that make it ideally suited for many medical applications. The company is actively developing products with its OEM partners and have shipped prototype orders.

Enters ceramic armor market: In July 2021, SINTX acquired from B4C, LLC the equipment and technical processes required to make ballistic armor plates. The acquisition price was ~\$2.8 million. Separately, SINTX entered into a technology license agreement with Precision Ceramics USA Inc. to manufacture a ceramic composite for defense armor applications. SINTX anticipates revenue beginning in 2022 for the launch of SINTX Armor.

Large market potential: The company is aiming for wide commercial opportunities across medical and non-medical industries for silicon nitride. For SINTX Armor, expected applications for the high-performance ceramic armor plates include personnel, aircraft, and armored vehicle uses.

Key catalysts expected in 2022/23: SINTX's goal over the next year is to reach key technology and sales milestones including: 1) support CTL and drive further adoption of silicon nitride spinal fusion devices 2) develop commercial opportunities outside of spine 3) apply its silicon nitride technology platform to other OEM opportunities 4) launch of SINTX Armor.

Acquisition of TA&T: In June, the company acquired Technology Assessment and Transfer, Inc., increasing SINTX's capabilities in the aerospace, defense, and biomedical markets. TA&T is an advanced ceramics business that specializes in developing innovative materials for defense, biomedical, and industrial applications. The purchase price was \$760,000.

Capital raise: In October (current Q4), the company raised \$4.7 million in a shares rights offering. We believe the company has enough cash until mid-2023.

Positive high risks versus rewards: While we expect numerous silicon nitride products to be announced over the next year, there is still a long road to successful product commercialization. However, we believe the ~billion dollars market potentials presents a high reward for the risks.

Current valuation attractive: Maintaining our BUY rating, but lowering our 12-month price target to \$2.00 from \$2.50. This is based on a NPV analysis, representing significant upside from the current share price. We believe this valuation appropriately balances out the company's high risks with the company's high growth prospects and large upside opportunities.

Company Description

Based in Salt Lake City, UT, SINTX Technologies is an OEM ceramics company that develops and commercializes silicon nitride for medical and non-medical applications.

Important Disclosures

Ascendant Capital Markets LLC seeks to do business with companies covered by its research team. Consequently, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making an investment decision.

For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report, beginning on page 14.

Exhibit 1: SINTX Investment Highlights

SINTX Technologies Vision

Advanced ceramic technology, knowledge, and skills toward customer solutions

Strengths – Our People and our Technology

OEM- Spine Implants

Proven - >35,000 spine implants over 10 years

Largest body of data, including independent 30-year clinical follow-up in Australia

Advanced Ceramics

Develop and commercialize outside spine

Core products + Non-biomedical applications

Antipathogenic Applications

New focus on antibacterial, antiviral, antifungal applications

Focus Markets

Biomedical

- Used in over 40,000 human spine implantations
- Expanding with composites and coatings

Antipathogenic

- Antibacterial, antifungal, and antiviral applications
- Applications to PPE, filters, surfaces, coatings, wound care, catheters, wound drains, incontinence, and fem care

Industrial/Armor

- Able to withstand extreme conditions
- Used in aerospace, bearings, and drilling
- Personnel, aerospace, and vehicle protection

Source: Company reports.

Exhibit 2: SINTX's Silicon Nitride

SINTX Technologies Inc.

SINTX Technologies is a leading manufacturer of silicon nitride.

Silicon nitride...

- Is favorable to human cells and promotes bone fusion
- Discourages bacterial adhesion on its surface
- Inactivates viruses—including the SARS-CoV-2 virus

SINTX has investigated silicon nitride heavily, with over 130 peer-reviewed scientific papers and presentations.

Prospective Catalysts for Growth

Non-medical Devices

SINTX has some of the strongest silicon nitride in the world

SINTX has shipped several non-medical components in 2020 – the first in the Company's history

SINTX has collaborative arrangements with several ceramics companies to share quoting opportunities, and to develop 3-D printed silicon nitride and other technologies

The Company is pursuing AS9100 certification and has obtained ITAR registration in order to enter the aerospace and defense markets

Exhibit 3: SINTX's Product Market Opportunity

CERVICAL INTERBODY SPINAL FUSION DEVICES

THORACOLUMBAR INTERBODY SPINAL FUSION DEVICES

FEMORAL HEAD FOR TOTAL HIP*

FEMORAL COMPONENT FOR TOTAL KNEE*

DENTAL IMPLANT*

THE IDEAL BIOMATERIAL

Strength and fracture toughness: Interlocking anisotropic grains deflect and bridge cracks.

Wear resistance: High hardness, strength, and fracture toughness prevent wear.

Material phase stability: No spontaneous phase transformation or associated weakening.

Hydrophilicity: Tunable through modification of surface topography and chemistry, from $<10^\circ$ up to $\sim 70^\circ$.

Osseointegration: Nanostructured topography combined with complex surface chemistry optimal for cell adhesion and bone growth.

Favorable imaging: Semi-radiolucent density appears bone-like in X-rays and low magnetic susceptibility eliminates distortion in CT and MRI scans.

Bacterial resistance: Surface chemistry, nanotexture, and charge inhibit biofilm formation.

* Product Candidates

Exhibit 4: SINTX Armor

ARMOR

There is an ever-increasing demand for lightweight, comfortable ceramic armor with advanced protection against armor piercing rounds. SINTX's ARMOR ceramics offer advanced hardness and extreme light weight.

Transparent ceramic ARMOR provides superior ballistic protection at less than half the weight and thickness over traditional glass laminates.

AEROSPACE
ARMOR

ARMOR

BODY
ARMOR

SINTX Armor – New in 2021

SINTX has entered the ceramic armor market through the purchase of assets and technology from B4C, LLC and a technology partnership with Precision Ceramics USA. SINTX will develop and manufacture high-performance ceramic armor plates for personnel, aircraft, and armored vehicles.

- **BoroShock:** A 100% Boron Carbide material for ultimate lightweight performance in ballistic applications.
- **DuraShock:** A composite material made of Boron Carbide and Silicon Carbide – licensed from Precision Ceramics USA – for exceptional multi-hit performance against ballistic threats.

Exhibit 5: Silicon Nitride Antipathogenic, Biomedical, and Industrial Catalysts for Growth

BIOMEDICAL

METAL COATINGS

Ceramic coatings for metal orthopedic and dental surgical implants and replacements. These coatings are targeted at overcoming the clinical limitations of metallic implants.

REGULATORY CLEARANCES FOR SPINAL IMPLANTS

Pursuing FDA clearance for SN-PEEK spinal fusion devices in the U.S. and similar clearances in OUS markets.

DENTAL

Working with dental implant companies to potentially supply novel silicon nitride and zirconia-based dental implants.

ABLATION TIPS

Quoting two global medical device companies for a significant volume of 3D printed bioceramic surgical ablation tips.

FOOT AND ANKLE

Leveraging success in spine market to attract interest from global leaders in this specialty area.

ANTIPATHOGENIC

AP FACE MASKS AND MASK FILTERS

Developing civil use antipathogenic face protection.

AUTOMOTIVE CABIN AIR FILTERS

Working with an automotive company on cabin air filters to reduce bacteria and virus.

WOUND CARE

Evaluating antipathogenic wound dressings (bandages, surgical care) for reduced bacteria growth.

MEDICAL TUBING COATINGS

Developing coatings for catheters and medical tubing aimed at reducing infections.

TECHNICAL CERAMICS

COMMERCIAL JETS

Working with two major companies on commercial jet ignition systems – silicon nitride is enabling.

RF ANTENNAS

Working with several companies on RF antennas applications due to the excellent dielectric properties of silicon nitride.

ARMOR

The SLC ARMOR plant will start up in the 4th quarter 2022 with strong interest from potential customers.

WELDING COMPONENTS

In production: components for high-speed welding with an international OEM for automotive applications.

CRITICAL APPLICATIONS

Engaged with more than 20 companies in evaluations of our materials in critical applications such as energy and defense.

GOVERNMENT CONTRACTS & GRANTS

NAVAL RESEARCH LABORATORY

Ultra hard materials for armor applications that supports power protection and war fighter protection in military generators and vehicles.

HIGH EFFICIENCY HEAT EXCHANGERS

Developed for high performance military equipment by the Office of Naval Research and Commercial HVAC systems for the Department of Energy.

MISSILE DEFENSE AGENCY

Extended life coatings for electrochemical machining tools.

FUTURE GOVERNMENT CONTRACTS

Leverage 40 years and \$40+M in contracts and technical experience for future opportunities and innovations that can address market needs.

DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

CMC combustor for high heat temps.

GRANTS

In the last year, awarded three phase 1 grants from NIH totaling \$900K for 3D printed composite devices: spine implants, craniomaxillofacial implants, and trauma plates.

SINTX

Exhibit 6: SINTX Summary

SUMMARY

PORTFOLIO & EXPERTISE

SINTX holds a broad portfolio of advanced ceramics materials, with application across technical, antipathogenic, and medical market sectors. SINTX has unmatched global expertise in the development and application of silicon nitride, the premium portfolio offering.

EVOLVING

SINTX has fundamentally transformed, over the past two years, from a specialty materials company into an OEM that can serve many different markets with various product offerings that span significant ranges of quality, value, and economics.

INVEST

Invest at the inflection point as SINTX begins a new trajectory immediately post two acquisitions which set up the organization for long-term success

Source: Company report.

Exhibit 7: SINTX Planned 2022 Goals

2022 KEY OBJECTIVES

EXECUTE ON THE LAUNCH OF SINTX ARMOR

Get the new facility fully operational

Generate revenue in the 4th quarter

DEVELOP NEW LINES OF REVENUE

New markets: Antipathogenic & Technical

New non-spine products

Pursue M&A opportunities

EXPAND SILICON NITRIDE'S SUCCESSES IN SPINE

New materials (SN-PEEK), new manufacturing technologies, new global markets

MAINTAIN MATERIALS R&D PROGRAM

Maintain leadership, monitor competitive landscape

New products with external partners

Expand with TA&T 3D printing, CMC, and coating applications

Source: Company reports.

Exhibit 8: SINTX Enters Ceramic Armor Market (July 2021)

SINTX ENTERS CERAMIC ARMOR MARKET THROUGH PURCHASE OF ASSETS FROM B4C, LLC AND TECHNOLOGY LICENSE FROM PRECISION CERAMICS USA INC.

JULY 22, 2021 9:00AM EDT

[Download as PDF](#)

SALT LAKE CITY, UT, July 22, 2021 (GLOBE NEWSWIRE) -- SINTX Technologies, Inc. (NASDAQ: SINT) ("SINTX" or the "Company") (www.sintx.com), an original equipment manufacturer (OEM) of silicon nitride ceramic for medical and non-medical applications, announced today that it has entered an asset purchase agreement with B4C, LLC of Dayton, Ohio, to acquire the equipment and technical processes required to make ballistic armor plates. Separately, SINTX also entered into a technology license agreement with Precision Ceramics USA Inc. (precision-ceramics.com) to manufacture a ceramic composite for defense armor applications.

Ceramic materials are an integral part of modern armor systems because of their light weight and resistance to high velocity projectiles. Governments worldwide are investing in novel ceramic armor solutions to protect law enforcement and military personnel as well as vehicles, aircraft, and ships against high-intensity threats. B4C, LLC is a specialty producer of Boron Carbide, a ceramic material used in the manufacture of protective body armor plates. Precision Ceramics USA Inc. is an international expert in technical ceramic component solutions.

Through its newly-created and wholly-owned subsidiary called **SINTX Armor**, the Company plans to utilize a two-pronged strategy. The assets acquired from B4C will be used to manufacture and market pure Boron Carbide - the highest strength ceramic armor available. These are designed to protect soldiers against hardened, high-velocity projectiles, against which other materials are not as effective. Additionally, SINTX will jointly develop and manufacture a special, lower cost composite of Boron Carbide and Silicon Carbide, under an exclusive license from Precision Ceramics USA Inc. The composite material is targeted at the law enforcement and civilian armor markets.

Exhibit 9: SINTX Acquisition of Technology Assessment and Transfer, Inc. (in July 2022)

July 6, 2022

SINTX Technologies Acquires Technology Assessment and Transfer, Inc.

The Acquisition Broadens Opportunities for SINTX in Aerospace, Defense, and Biomedical Markets

SALT LAKE CITY--(BUSINESS WIRE)-- SINTX Technologies, Inc. (www.sintx.com) (NASDAQ: SINT) ("SINTX" or the "Company"), an original equipment manufacturer of advanced ceramics, announced the acquisition of Technology Assessment and Transfer, Inc. (TA&T; <https://www.techassess.com/>), significantly increasing SINTX's capabilities in the aerospace, defense, and biomedical markets.

"We are excited to acquire TA&T and take another step towards diversifying and strengthening SINTX," said Dr. Sonny Bal, President and CEO of SINTX. "TA&T will expand our use of advanced manufacturing technologies and introduce new ceramic material platforms to the SINTX portfolio. We expect the acquisition to bring immediate revenue to SINTX via TA&T's well-established relationships with commercial partners and the U.S. government."

TA&T, based in Maryland, is a nearly 40-year-old advanced ceramics business that specializes in developing and commercializing a broad array of innovative materials for defense, biomedical, and industrial applications. The company's technologies and products include 3D printing of ceramic medical devices and heat exchangers, chemical vapor infiltration and deposition of complex fiber-reinforced ceramic-matrix composites, and hot pressing of transparent armor and other technical ceramics. TA&T has a long track record of successfully winning research contracts and grants from the U.S. government and commercializing its innovative technologies.

As an example of TA&T's innovation, ceramic heater bodies developed, designed, and manufactured by TA&T are a part of the Sample Analysis on Mars (SAM) instrument suite on board the Curiosity Rover (<https://mars.nasa.gov/msl/home/>). These oven heater bodies were manufactured by TA&T using Ceramic Stereolithography, a form of 3D printing and additive manufacturing, and can withstand the extreme temperatures of more than 1,500°F that are required to heat soil samples on Mars in hopes of detecting signs of life. TA&T was selected by NASA to make these parts because of the prohibitive cost of traditional manufacturing techniques.

"Technology Assessment and Transfer is excited about the opportunity that the SINTX acquisition provides for product growth in commercial, aerospace, and medical applications," said Dr. Larry Fehrenbacher, Co-Founder and President of TA&T. "The blend of federally-funded innovative technologies and SINTX's business acumen is a compelling synergistic formula for future success."

- Ascendant Capital Markets, LLC has received compensation for advisory or investment banking services from the company in the past 12 months.

IMPORTANT DISCLOSURES

This report has been distributed by Ascendant Capital Markets, LLC and is for the sole use of our clients. This report is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. This report contains information from various sources, including United States government publications, The Wall Street Journal and other periodicals, Yahoo! Finance and other sources, and is for informational purposes only and is not a recommendation to trade in the securities of the companies mentioned within the report. We seek to update our research and recommendations as appropriate, but the large majority of reports are published at irregular intervals as we consider appropriate and, in some cases, as constrained by industry regulations.

We may have a business relationship with companies covered in this report. Ascendant Capital Markets, LLC may make a market in the securities of the subject company. We and our affiliates, officers, directors, and employees will from time to time have long or

short positions in, act as principal in, and buy or sell, the securities or derivatives (including options and warrants) thereof of covered companies referred to in this report. This report is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any information in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of the investments referred to in this report may fluctuate.

Following are some general risks that can adversely impact future operational and financial performance and share price valuation: (1) industry fundamentals with respect to legislation, mandates, incentives, customer demand, or product pricing; (2) issues relating to competing companies or products; (3) unforeseen developments with respect to management, financial condition or accounting policies or practices; or (4) external factors that affect the interest rates, currency, the economy or major segments of the economy. Past performance is not a guide to future performance, future returns are not guaranteed, and loss of original capital may occur. Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Our report is disseminated primarily electronically, and, in some cases, in printed form. The information contained in this report is not incorporated into the contents of our website and should be read independently thereof. Copyright Ascendant Capital Markets, LLC. No part of this material may be copied, photocopied or duplicated by any means or redistributed without the prior written consent of Ascendant Capital Markets, LLC.

Risks & Considerations

Risks to attainment of our share price target include balance sheet/liquidity risks, failure of product candidates to demonstrate safety and efficacy in clinical trials/studies, failure to gain/maintain regulatory approvals, ability to commercialize product, failure to obtain suitable reimbursement, competition, changing macroeconomic factors, investor sentiment for investing in biotech/medtech stocks, and changes in consumer or government priorities for healthcare.

Ascendant Capital Markets, LLC Rating System

BUY: We expect the stock to provide a total return of 15% or more within a 12-month period.

HOLD: We expect the stock to provide a total return of negative 15% to positive 15% within a 12-month period.

SELL: We expect the stock to have a negative total return of more than 15% within a 12-month period.

Total return is defined as price appreciation plus dividend yield.

Ascendant Capital Markets, LLC Rating System

Prior to January 31, 2014, ASCM used the following rating system:

Strong Buy: We expect the stock to provide a total return of 30% or more within a 12-month period.

Buy: We expect the stock to provide a total return of between 10% and 30% within a 12-month period.

Neutral: We expect the stock to provide a total return of between minus 10% and plus 10% within a 12-month period.

Sell: We expect the stock to provide a total return of minus 10% or worse within a 12-month period.

Speculative Buy: This rating is reserved for companies we believe have tremendous potential, but whose stocks are illiquid or whose equity market capitalizations are very small, often in the definition of a nano cap (below \$50 million in market cap). In general, for stocks ranked in this category, we expect the stock to provide a total return of 50% or more within a 12-month period. However, because of the illiquid nature of the stock's trading and/or the nano cap nature of the investment, we caution that these investments may not be suitable for all parties.

Total return is defined as price appreciation plus dividend yield.

Ascendant Capital Markets, LLC Distribution of Investment Ratings (as of October 7, 2022)

Rating	Count	Percent	Investment Banking Services Past 12 months	
			Count	Percent
