

Isaac Gomez

Adult Day Program DSP

Isaac has been working in the Adult Day Program since October 2022. Isaac has shown that he is a very reliable staff who cares about the individuals he works with and is able to provide appropriate supports while also maintaining a sense of humor as well as calmness that is appreciated by those around him. Isaac has developed meaningful relationships with many of the individuals he works with, and the LDSP/Shift Facilitator have noticed several individuals become excited when they find out Isaac is working with them that day. Isaac follows protocols and provides great supports but also asks questions when he is unsure of something or if he notices something out of the ordinary. Isaac is a team player and helps out co-staff when able and also makes adjustments to his schedule, takes on additional responsibilities, etc when asked by LDSP. In the past few months, Isaac has had several new staff “shadow” him as part of their training and he has provided important information and insight during these times. LDSP/coordinators, co-workers, and individuals served all know they can count on Isaac to come to work and bring a patient, positive atmosphere with him!
