User Manual

Settings

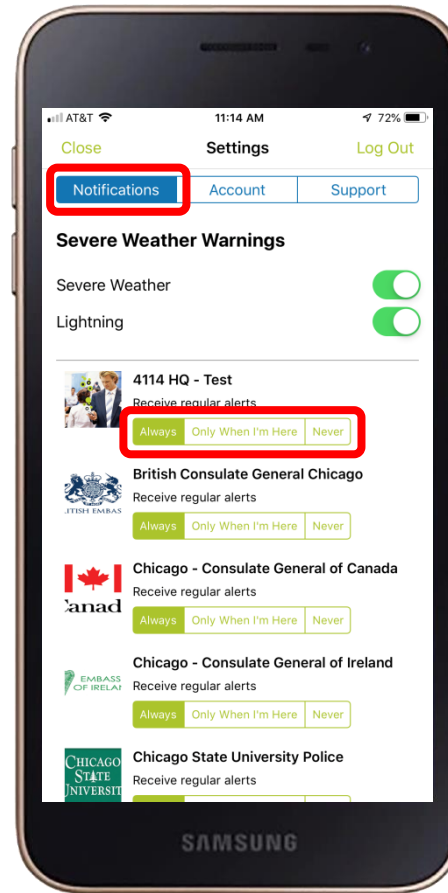

Settings

To make changes to your account and the groups you subscribe to, visit the “Menu” and select “Settings.”

Settings: Notifications tab

“Always”: You will receive both the banner notification and message regardless if you are physically on the property.

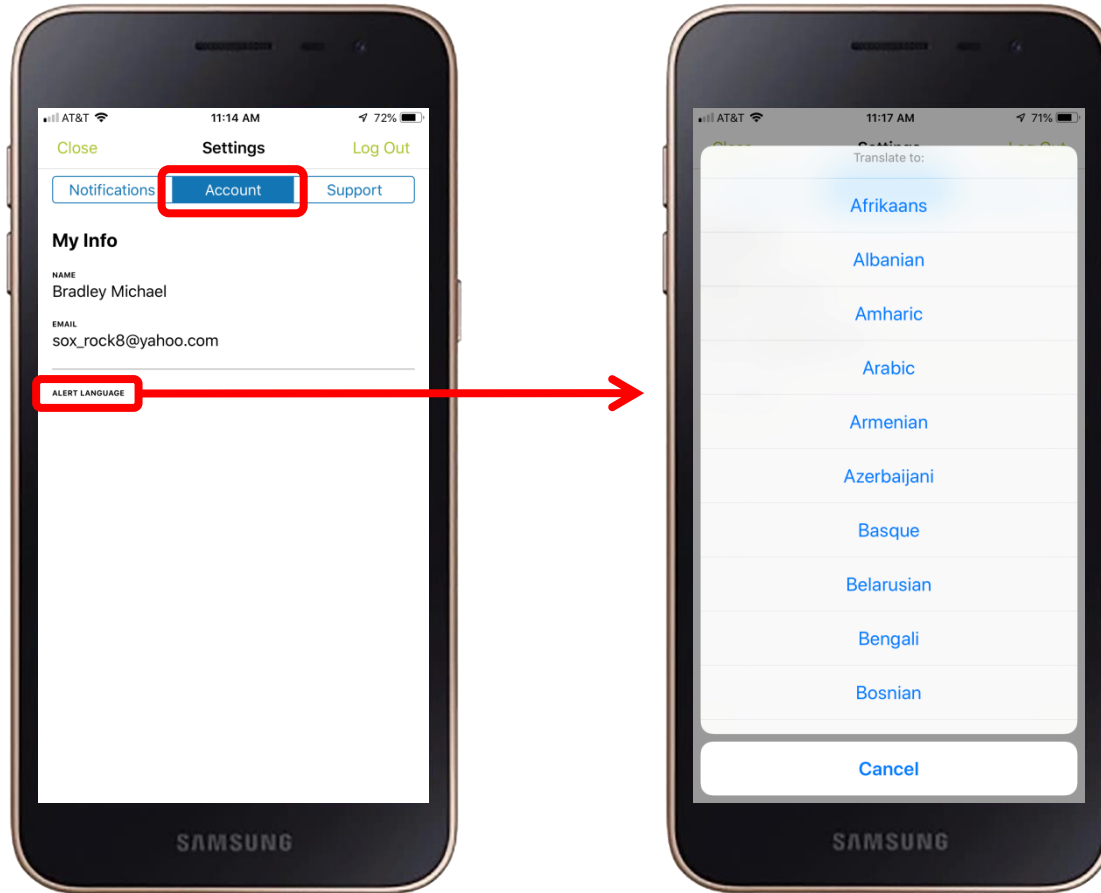

“Only When I’m Here”: You will receive the banner notification for the regular alert when you are on the property, but you will still receive the message in your inbox regardless of your location.

“Never”: You will never receive a banner notification for a regular alert, but you will still receive any messages from the group in your inbox.

Visit the “Notifications” tab to individually change the notification settings for each group. Regardless of the changes made, you will always receive both a notification and message for ping, critical, and life safety alerts.

Settings: Account tab

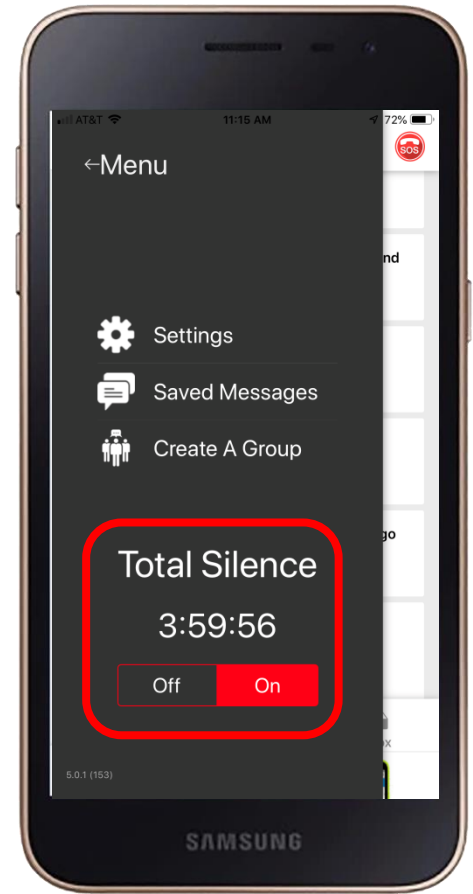

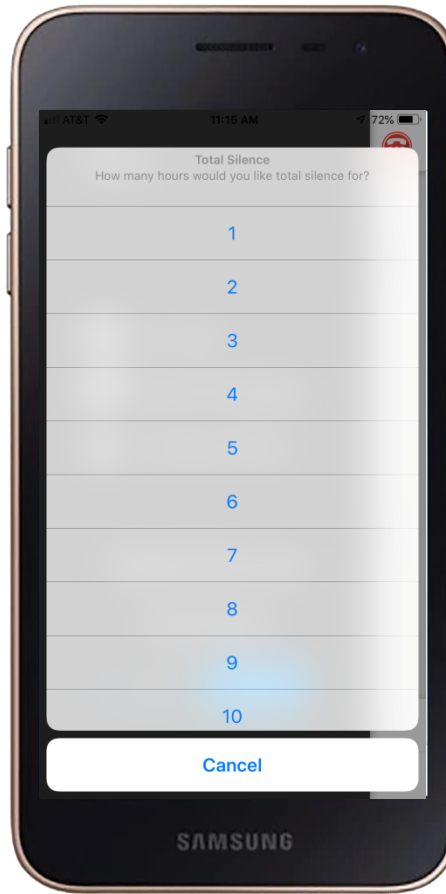

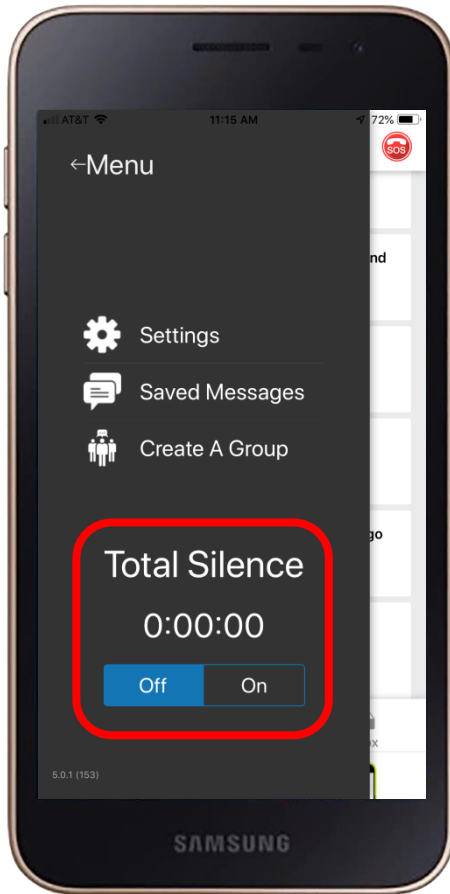

In-telligent translation is an important feature. To change the default language, select "Alert Language."

To make changes to the account's default settings, visit the "Account" tab.

Total Silence Feature

In times of emergency, absolute silence can also be critical. As such, by going to the "Menu" and toggling "Total Silence" on, ping/critical/life-safety alerts will not override your phone's silent switch. You can have Total Silence on for up to 12 hours. You will, however, still receive any messages that are sent out by your groups in your inbox (they just won't carry an audible alert).
