Translation Features

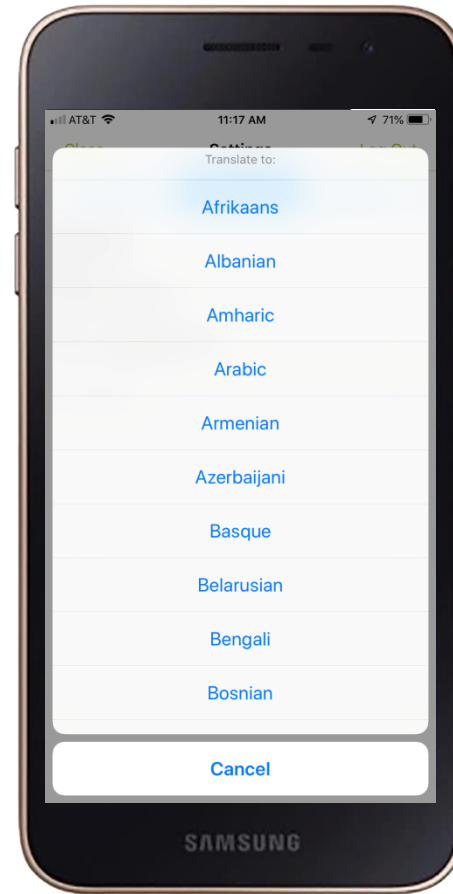

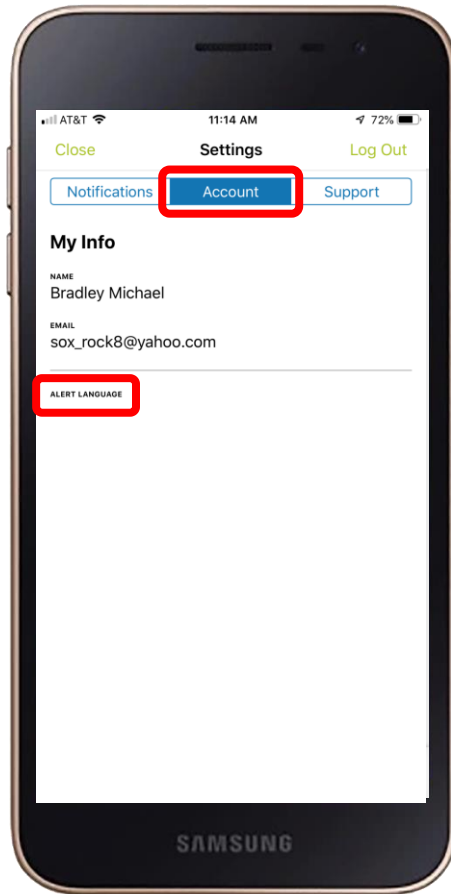

Setting Your Default Language

Within your account settings, you have the ability to change your default alert language to 100+ different languages. Visit the “Menu”, and then select “Settings” to get started.

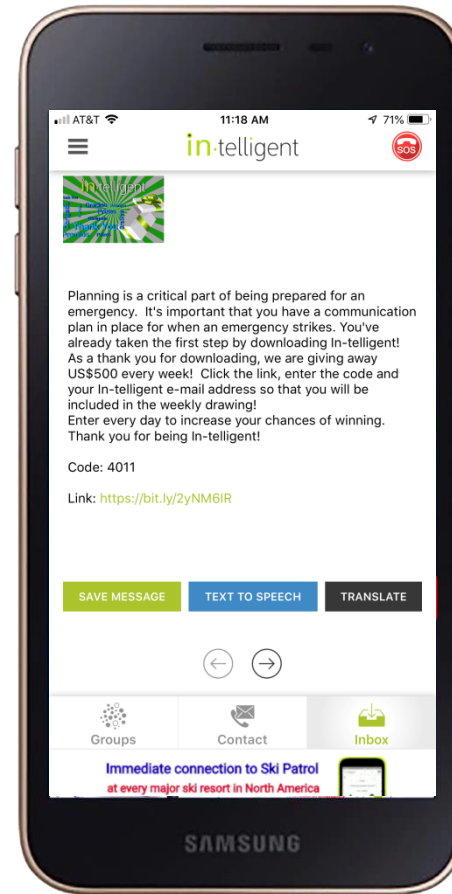

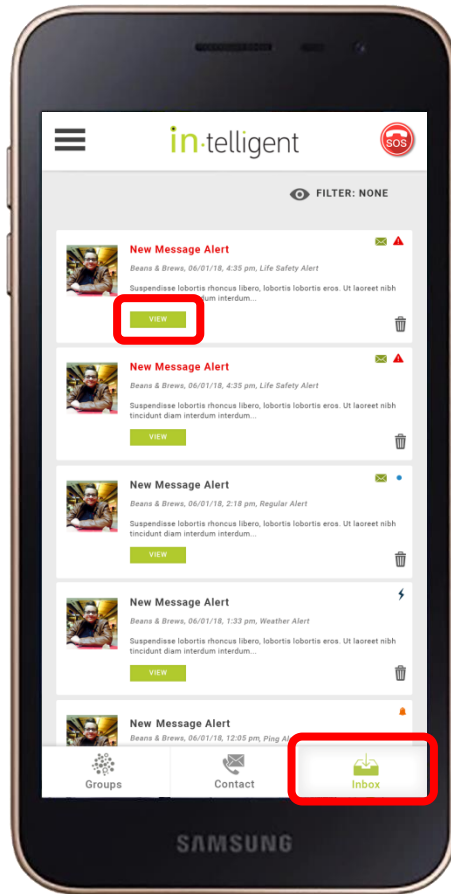

Setting Your Default Language

Once in the Settings, select the “Account” tab. Then, select “Alert Language” to view your options of default languages.

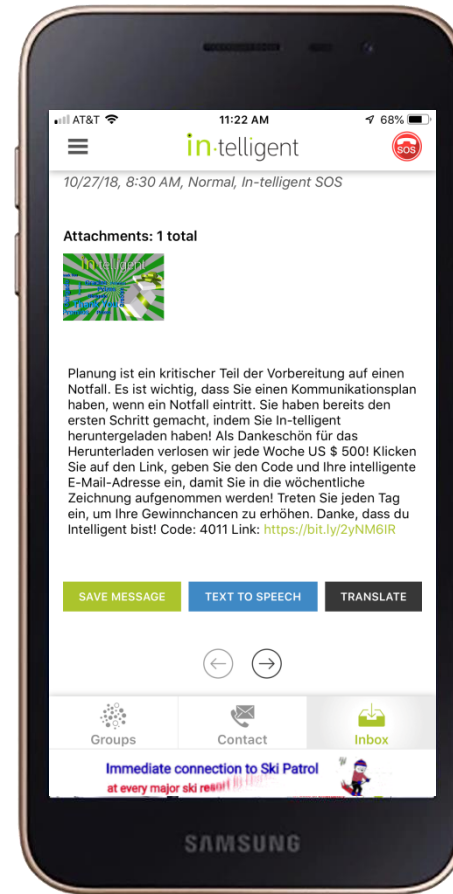

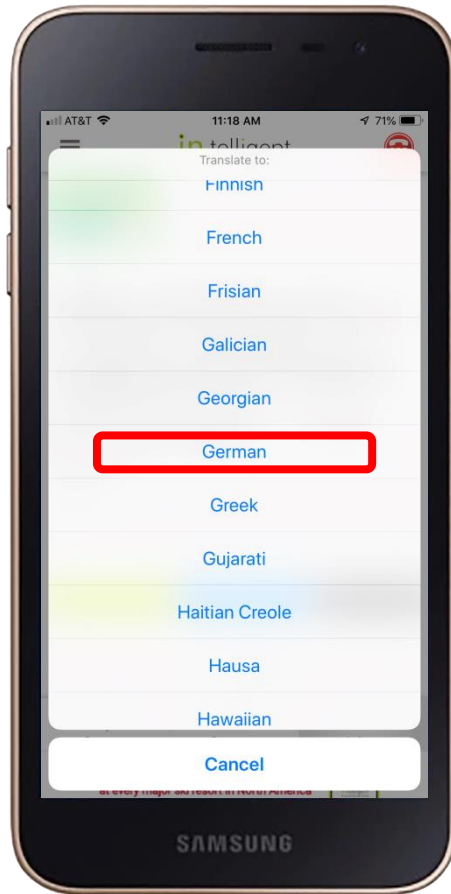

Translating a Message

Regardless of the language chosen in Settings, you have the ability to manually translate any individual message. Visit the “Inbox” tab and view a message. Then, tap “Translate”.

Translating a Message

From there, choose your desired language to translate the message.
